

Chronic Diseases Management Update 2011

Alaska – August 21-28, 2011

By participating in this program, the delegate will:

- Develop a working knowledge of current concepts in the management of Atrial Fibrillation, Diabetes, COPD, and Thromboembolic Disease
 - Be able to integrate their patients' use of natural medicine and the internet into their patient management strategies
 - Appreciate the importance of systems planning, team dynamics, and electronic medical records in their management of chronic diseases
 - Develop a strategy for managing physician health issues in their private and professional lives
-
- Our CME/CPD programs appeal to generalist physicians and to subspecialists with interest in the topic areas.
 - Our programs are presented with attention to adult learning and knowledge translation paradigms
